Frontend engineer with over 4 years of experience building scalable web apps using Angular, ReactJS, and VueJS. Currently at Zeraki, where I've developed Zeraki Finance, a school accounting solution used by over 1,000 schools to serve more than 100,000 students across East Africa.

SKILLS

- Frontend: Angular, React, Vue.js, Tailwind CSS
- Backend: NestJS, Express.js, Flask
- Languages: TypeScript, JavaScript, Python, Java
- Testing/Tools: Jest, Jasmine, Storybook, CI/CD

WORK EXPERIENCE

Frontend Software Engineer, Zeraki - Nairobi, Kenya

May 2021 - Present

- Led the front-end development of [Zeraki Finance](#) and other internal tools.
- Engineered a scalable front-end architecture using modularization, lazy-loading, and robust state management with NgRx, improving load times and application maintainability.
- Improved application security by implementing session timeouts, privacy blurs, input validation, and role-based access control, reducing attack vectors and ensuring secure user access.
- Set up automated testing and deployment pipelines to enable a fast release cycle and continuous delivery.
- Created a reusable component library to standardize UI components across multiple projects, leading to a reduction in development time for new features.

OPEN SOURCE CONTRIBUTIONS

ng-bootstrap (Angular UI library) - [PR #4845 – Add "Copy to clipboard" functionality](#) • [Issue #4826](#)

- Implemented a global "Copy to clipboard" feature for code snippets across the official ng-bootstrap documentation site, leading to improved developer experience.
- Collaborated with project maintainers, followed contribution guidelines, and responded to review feedback to ensure code quality and maintainability.

PROJECTS

Money Manager - <https://money-manager-101.web.app> (Angular, CDK, Karma, Jasmine, Tailwind CSS, PouchDB)

Angular-based web application for managing personal income and expenses.

- Implemented offline-first capabilities with PouchDB, enabling 100% feature usability even without internet connectivity.
- Developed modular UI components with Angular CDK, enabling rapid feature delivery while maintaining a clean and scalable codebase.

Personal Journaling App - <https://github.com/ezekiel-charo/Journal> (React Native, Expo, NestJS)

A cross-platform journaling mobile application with a robust backend and intuitive mobile UI.

- Delivered an intuitive UI in the form of a React Native mobile application, utilizing NativeBase component library, state management, and Expo's file-based routing.
- Developed a secure REST API with authentication (login/signup) and CRUD endpoints for journals and categories, using TypeORM for efficient database queries and class-validator for robust data validation.

EDUCATION

Masinde Muliro University of Science and Technology

BSc. Information Technology

2015 - 2019

- Key Coursework: Data Structures & Algorithms, Software Design Principles, and Programming Languages.
