PROFESSIONAL SUMMARY

Software engineer with over 4 years of experience building scalable, high-performance web applications using Angular. Expert in performance optimization and security best practices. Currently at Zeraki developing Zeraki Finance, a school accounting solution used by over 1,000 schools to serve more than 100,000 students across East Africa.

SKILLS

- **Frontend:** Angular, React, Next.js, Vue.js.
- **Backend:** Spring Boot, Express.js, NestJS.
- **Languages:** TypeScript, JavaScript, Java, Python.

WORK EXPERIENCE

Software Engineer, Zeraki - Nairobi, Kenya

May 2021 - Present

- Led end-to-end Angular development of Zeraki Finance, a school accounting solution serving 1,000+ schools across Kenya and Uganda, collaborating with cross-functional teams to architect scalable solutions with NgRx state management and modular architecture.
- Mentored and guided junior developers through code reviews and one-on-one sessions, participated in hiring processes (screening and interviewing candidates), and delivered technical presentations on topics such as offline-first architecture and A/B testing.
- Implemented comprehensive security best practices, including reCAPTCHA integration, input sanitization, input validation, session timeouts, privacy blurs, and role-based access control (RBAC), reducing attack vectors and ensuring secure user access and data protection.
- Developed and published reusable libraries, including @zeraki/zeraki-ui for standardizing UI components across multiple projects and @zeraki/printer for team-specific printing needs, reducing development time for new features and enabling consistent design patterns across the platform.
- Architected offline-first capabilities and client-side caching using RxDB, enhancing user experience in low-connectivity environments and reducing server load.
- Established CI/CD pipelines with Bitbucket for automated testing and deployment, enabling seamless continuous delivery and accelerating the release cycle by over 40%.
- Incrementally led Angular framework upgrades from version 12 towards 19, and migrated the UI from Bootstrap to Tailwind CSS, ensuring the application remained current with modern best practices and performance improvements.

OPEN SOURCE CONTRIBUTIONS

- **Ng-bootstrap** ([Issue #4826](#), [PR #4845](#)): Implemented "Copy to clipboard" feature for the documentation site, improving DX for thousands of developers.

PROJECTS

Money Manager - money-manager-101.web.app, github.com/ezeziel-charo/personal-finance-manager

- Developed an expense tracker with Angular and PouchDB, implementing modular UI components with Angular CDK and Tailwind CSS for rapid feature delivery, codebase scalability, and maintainability.
- Implemented comprehensive testing with Karma and Jasmine, writing unit tests for core services and components to ensure functionality and code reliability.

Ease - Point of Sale - ease-pos.web.app, github.com/ezeziel-charo/ease-point-of-sale

- Built a POS application with Angular, Firebase, and CapacitorJS, implementing a responsive UI that works seamlessly across mobile web, desktop, and Android.

- Designed a multi-tenancy system enabling admins to create multiple shops, manage other admins and employees, with role-based access control enforced through Firebase security rules.
- Implemented data integrity safeguards using Firestore transactions to prevent stock inconsistencies during sales, plus automated email workflows for account confirmation and password reset.

EDUCATION

Masinde Muliro University of Science and Technology BSc. Information Technology 2015 - 2019

- Coursework: Data Structures & Algorithms, Software Design Principles, and Programming Languages.
